

A Complete Solution

Installation Kits

- Includes all the hoses, tubes, isolators, clamps and couplers necessary to mate the radiator with your engine
- Reduce installation and assembly time by always having the right components
- Increase purchasing efficiency by consolidating suppliers

Aluminized Steel Tubing

- Custom CNC mandrel bent coolant tubes provide a high quality fit and finish to your package
- Available with straight, beaded, threaded or flanged connections
- Tapped ports can be installed upon request

Couplers and Clamps

- High quality Aramid silicone couplers and stainless steel clamps increase product longevity and reduce service time
- Couplers chosen specifically for your application for improved value and reliability
- Clamps available as T-bolt or worm gear
